moorgen smart panel

Swiss Series 1 . 1 . 1

Moorgen smart panel is outstanding in smart area. Slight touch to activate smart scene and combine with curtain, light, TV, AC, security, theater and value-added services. Waking up in the morning without motion, just touch "Wake Mode" accompany with elegant music and sunlight after sheer on

Moorgen Wired Smart System

3.1 Panel

Panel Products KNX 3.1.1 " Swiss Series " Smart Panel

86 × 86 panel
86 bottom box

Smart Pushbutton MK8011

- 15 color options
 - Made in Italy
 - 8 keys
 - Each key has LED backlight, the ETS software or combination keys
 - can control the brightness of LED indicator
- Input Voltage: DC21-31V

- Each key can be configured function of On/Off, dimming, folding curtain
 - control, shutter curtain control, scene
 - recovery, scene saving, cyclic sending
 - Each key can be configured function
 - of single-click, double-click, long-press
- Installation: Wall embedded
Dimension: 86 × 86 × 45.5 mm
Passed the KNX certification

KNX Thermostat MK8013

- 15 colors options
 - Made in Italy
 - 8 keys
 - Each key has LED backlight, the ETS software or combination keys can
 - control the brightness of LED indicator
 - The temperature sensor is located on the right side of the panel bottom and can send the temperature detection data to the system or third-party device in real time
- MK2008 should be added to control water aircon

- Control On/Off, mode, wind speed
 - and temperature of air conditioner
 - Input Voltage: DC21-31V
 - Installation: Wall embedded
 - Dimension: 86 × 86 × 45.5 mm
- Full details are given in topological map

KNX Thermostat MK8302

- 15 colors options
 - Made in Italy
 - 8 keys
 - Each key has LED backlight, the ETS software or combination keys can
 - control the brightness of LED indicator
 - The temperature sensor is located on the right side of the panel bottom and can send the temperature detection data to the system or third-party device in real time
- MK2008 should be added to control water aircon

- Control On/Off, mode, wind speed
 - and temperature of air conditioner
 - Input Voltage: DC21-31V
 - Installation: Wall embedded
 - Dimension: 86 × 86 × 45.5 mm
- Full details are given in topological map

**Two-Hole USB Socket
MB8708**

P

- 5 color options
- Power Supply: AC220V~16A
- Installation: 86 bottom box

- Material: Plastic
- Dimension: 86×86×47.8 mm

**Two-Hole USB Socket
MB8602**

C

**UK Socket
MB8713**

C

- 11 color options
- Power Supply: AC 220V~ 10A
- USB Output Voltage: DC5V/2.1A
- Installation: 86 bottom box
- Material: Aluminum magnesium alloy and plastic
- Dimension: 86×86×47.8 mm
- The product has CCC

- 9 color options
- Power Supply: AC 220V~ 13A
- Installation: 86 bottom box
- Material: Aluminum magnesium alloy and plastic
- Dimension: 86×86×25 mm
- The product has CEC
- Gem grey, Luxemburg gold, Ferrari red, deep coffee, champagne gold, champagne silver, snowflake silver, mica black, warm white

C

- 11 color options
- Installation: 86 bottom box
- Material: Aluminum magnesium alloy and plastic
- Dimension: 86×86×30 mm

Double LAN Panel
MB8689

P

- 5 color options
- Installation: 86 bottom box
- Material: Plastic
- Dimension: 86×86×30 mm

1-Gang Flat Mechanical Panel
MB8331

P

- 5 color options
- Output dry contact signal
- Installation: 86 bottom box
- Material: Plastic
- Dimension: 86×86×25 mm
- The product has CCC

1-Gang 2-way Flat Mechanical Panel
MB8338

P

- 5 color options
- One key control dual functions
- Output dry contact signal
- Installation: 86 bottom box
- Material: Plastic
- Dimension: 86×86×25 mm
- The product has CCC

2-Gang Flat Mechanical Panel
MB8332

P

- 5 color options
- Output dry contact signal
- Installation: 86 bottom box
- Material: Plastic
- Dimension: 86×86×25 mm
- The product has CCC

2-Gang 2-way Flat Mechanical Panel
MB8339

P

- 5 color options
- One key control dual functions
- Output dry contact signal
- Installation: 86 bottom box
- Material: Plastic
- Dimension: 86×86×25 mm
- The product has CCC

3-Gang Flat Mechanical Panel
MB8333

P

- 5 color options
- Output dry contact signal
- Installation: 86 bottom box
- Material: Plastic
- Dimension: 86×86×25 mm
- The product has CCC

3-Gang 2-way Flat Mechanical Panel
MB8350

P

- 5 color options
- One key control dual functions
- Output dry contact signal
- Installation: 86 bottom box
- Material: Plastic
- Dimension: 86×86×25 mm
- The product has CCC

1-Gang Rocker Switch
MB8325

P

- 5 color options
- Output dry contact signal
- Installation: 86 bottom box
- Material: Plastic
- Dimension: 86×86×25 mm
- The product has CCC

1-Gang 2-way Rocker Switch
MB8335

P

- 5 color options
- One key control dual functions
- Output dry contact signal
- Installation: 86 bottom box
- Material: Plastic
- Dimension: 86×86×25 mm
- The product has CCC

2-Gang Rocker Switch
MB8326

P

- 5 color options
- Output dry contact signal
- Installation: 86 bottom box
- Material: Plastic
- Dimension: 86×86×25 mm
- The product has CCC

2-Gang 2-way Rocker Switch
MB8336

P

- 5 color options
- One key control dual functions
- Output dry contact signal
- Installation: 86 bottom box
- Material: Plastic
- Dimension: 86×86×25 mm
- The product has CCC

3-Gang Rocker Switch
MB8327

C

- 5 color options
- Output dry contact signal
- Installation: 86 bottom box
- Material: Plastic
- Dimension: 86×86×25 mm
- The product has CCC

3-Gang 2-way Rocker Switch
MB8337

C

- 5 color options
- One key control dual functions
- Output dry contact signal
- Installation: 86 bottom box
- Material: Plastic
- Dimension: 86×86×25 mm
- The product has CCC

moorgen smart home

Moorgen Wired Smart System Price List - 3.2 Lighting

Light Products KNX 3.2.1

Universal Switch Actuator 4-Channel 16A
MK2001

- Made in Italy
- A KNX bus interface
- The device has 4 outputs, each of them can be configured separately to control light / load, or in pairs to control roller shutter and shutter
- With 2 Channels: A/B
- Installation: DIN rail
- Dimension: 72×90×58 mm

1-Channel 700W Dimming Main Module
MK2007

- Made in Italy
- A KNX bus interface and a host interface
- KNX bus driver control the brightness of lighting devices, such as 230 volt incandescent lamps and halogen lamps.
- As the master dimmer, it can drive two slave dimmers (MK2007S)
- Support front edge and back edge dimming
- Installation: DIN rail
- Dimension: 72×90×58 mm

4-Channel 1~10V Dimming Module
MK2003

- Made in Italy
- A KNX bus interface is used to drive lighting device with 0-10V interface
- The product can control four outputs, each with a maximum of 50 mA
- Installation: DIN rail
- Dimension: 72×90×58 mm
- Passed the quality inspection

4-Channel LED Dimming Module
MK2006

- Made in Italy
- A KNX bus interface
- LED constant voltage drive dimmer; voltage range is 12-48v
- It can control 4 independent LED outputs, or single RGB dimming relay output, with the maximum load current of 16A
- Installation: DIN rail
- Dimension: 72×90×58 mm

1-Channel 700W Dimming Slave Module
MK2007S

- Made in Italy
- A KNX slave interface
- KNX bus driver control the brightness of lighting devices, such as 230 volt incandescent lamps and halogen lamps.
- Support front edge and back edge dimming
- Protocol: KNX
- Installation: DIN rail
- Dimension: 72×90×58 mm

8-Channel 16A Universal Switch Module
MK2008

- Made in Italy
- A KNX bus interface
- The device has 8 outputs, each of them can be configured separately to control light / load, or in pairs to control roller shutter and shutter
- With 4 Channels: A/B
- Installation: DIN rail
- Dimension: 72×90×58 mm
- Passed the quality inspection

4-Channel 300W Dimming Module
MK2010

- Made in Italy
- A KNX bus interface
- KNX bus driver control the brightness of lighting devices, such as 230 volt incandescent lamps and halogen lamps.
- It can automatically identify the type of connected load
- Support front edge and back edge dimming
- Installation: DIN rail
- Dimension: 142×90×60 mm

12-Channel 16A Universal Switch Module
MK2012

- Made in Italy
- A KNX bus interface
- The device has 12 outputs, each of them can be configured separately to control light/load, or in pairs to control roller shutter and shutter
- With 6 Channels: A/B
- Installation: DIN rail
- Dimension: 159×90×58 mm

moorgen smart home

Moorgen Wired Smart System -

3.3 Host

Host Products KNX 3.3.1

KNX To USB Module
MK7000

- Made in Italy
- A KNX bus interface and a USB interface
- Connect the computer via USB to program or monitor KNX
- Dimension: 20×90×58 mm

KNX/IP interface
MK7001

- Made in Italy
- A KNX bus interface and a RJ45 interface
- Connect PC to KNX / EIB network through LAN (IP) interface
- IP addresses can be dynamically assigned through a DHCP server or manual configuration (ETS software)
- Dimension: 36×90×58 mm

POE power supply KNX/IP gateway
MK7021

- Made in Italy
- A KNX bus interface and a RJ45 interface
- It can be used as a fast trunk line to send control messages between different branches through LAN (IP); used as a programming interface to connect PC with KNX bus (for example, ETS programming). IP addresses can be dynamically assigned through a DHCP server or manual configuration (ETS software); used according to KNXnet / IP specification and operated with core, device management, tunnel and routing functions. Can send control messages in bi-directions; can buffer up to 150 control signal messages due to filter table
- Dimension: 36×90×58 mm

640mAh Power Supply
MK7009

- Made in Italy
- The built-in choker of bus voltage band can be provided for a circuit with no more than 64 bus devices, which is used to isolate the power supply of the bus, interrupt the voltage and reset the bus devices connected in the circuit.
- Installation: DIN rail
- Dimension: 107×90×58 mm

Web server gateway
MK7012

- Made in Italy
- A KNX bus interface
- Built in a 485 interface, a 232 interface, 2 USB interfaces and a high-speed Ethernet interface
- Support web browser, IOS and Android client app access
- Support no more than 1400 KNX group addresses
- Installation: DIN rail
- Dimension: 89×98×62 mm
- Protocol: Modbus

Line Coupler
MK7002

- Made in Italy
- Used for logic connection and current isolation in the branch line and area; used as branch line coupler to connect the branch line with the main line, or backbone coupler to connect the main line with the backbone line
- Support long message (up to 250 bytes) transmission.
- The front keys can be configured with special functions, which are very useful during commissioning, installation or fine-tuning
- Dimension: 36×80×58 mm

RS485 converter
MT5022

- KNX to 485 module
- Power Supply: 21-30VDC
- Operating Current: 12mA
- Protocol: RS485
- Support predefined serial communication processing
- Installation: 35mm DIN rail
- Dimension: 64×90×36mm

moorgen smart home

Moorgen Wired Smart System Price List - 3 . 4 Security

Security Products KNX 3 . 4 . 1

Inwall 3 Input / 2 Output Module MK8003

¥2750

- Made in Italy
- A KNX bus interface
- 2 digital inputs, 1 analog input, 2 relay outputs (bistable)
- After the digital input is connected with the zero potential contact, it can be connected to sensors, conventional buttons, etc, which can control on/off, dimming, shutter, scene memory, and can also sort three objects; Analog input controls a temperature measuring probe (On/Off) or a thermostat heating and cooling devices, valves, 2 and 4 duct ventilation coils, etc

- The analog input can replace the temperature sensor to adjust the infrared receiver (Irx), and control the infrared remote controller (IRC) with on/off command, scene setting, two object sorting functions, dimming and curtain functions through the bus.
- There are up to 8 channel inputs.
- Output: timing relay conversion function, stair function, scene recall function, locking function and logic function
- Dimension:52×28 mm

4 Input/4 LED Output Wall Mounted Module MK8009

¥1375

- Made in Italy
- A KNX bus interface
- After the digital input is connected with the zero potential contact, it can be connected to sensors, conventional buttons, etc, which can be used for on/off, dimming, shutter control, scene recall and control,etc.
- 4 digital inputs, 4 LED indication outputs

- Installation: Standard bottom box
- Dimension:43×36×17mm

Ceiling Duty/Light Sensor MK5010

¥3750

- Made in Italy
- A KNX bus interface
- Detect motion, presence, and ambient light level
- Remote control via infrared: The infrared command is converted into the corresponding data control signal (Up to 6 signals). During brightness related motion detecting, the device will continuously detect the indoor brightness. When the natural light is sufficient, the light will turn off even if someone is there.
- The delay time can be set through ETS
- Installation: Wall embedded
- Dimension:98×50 mm

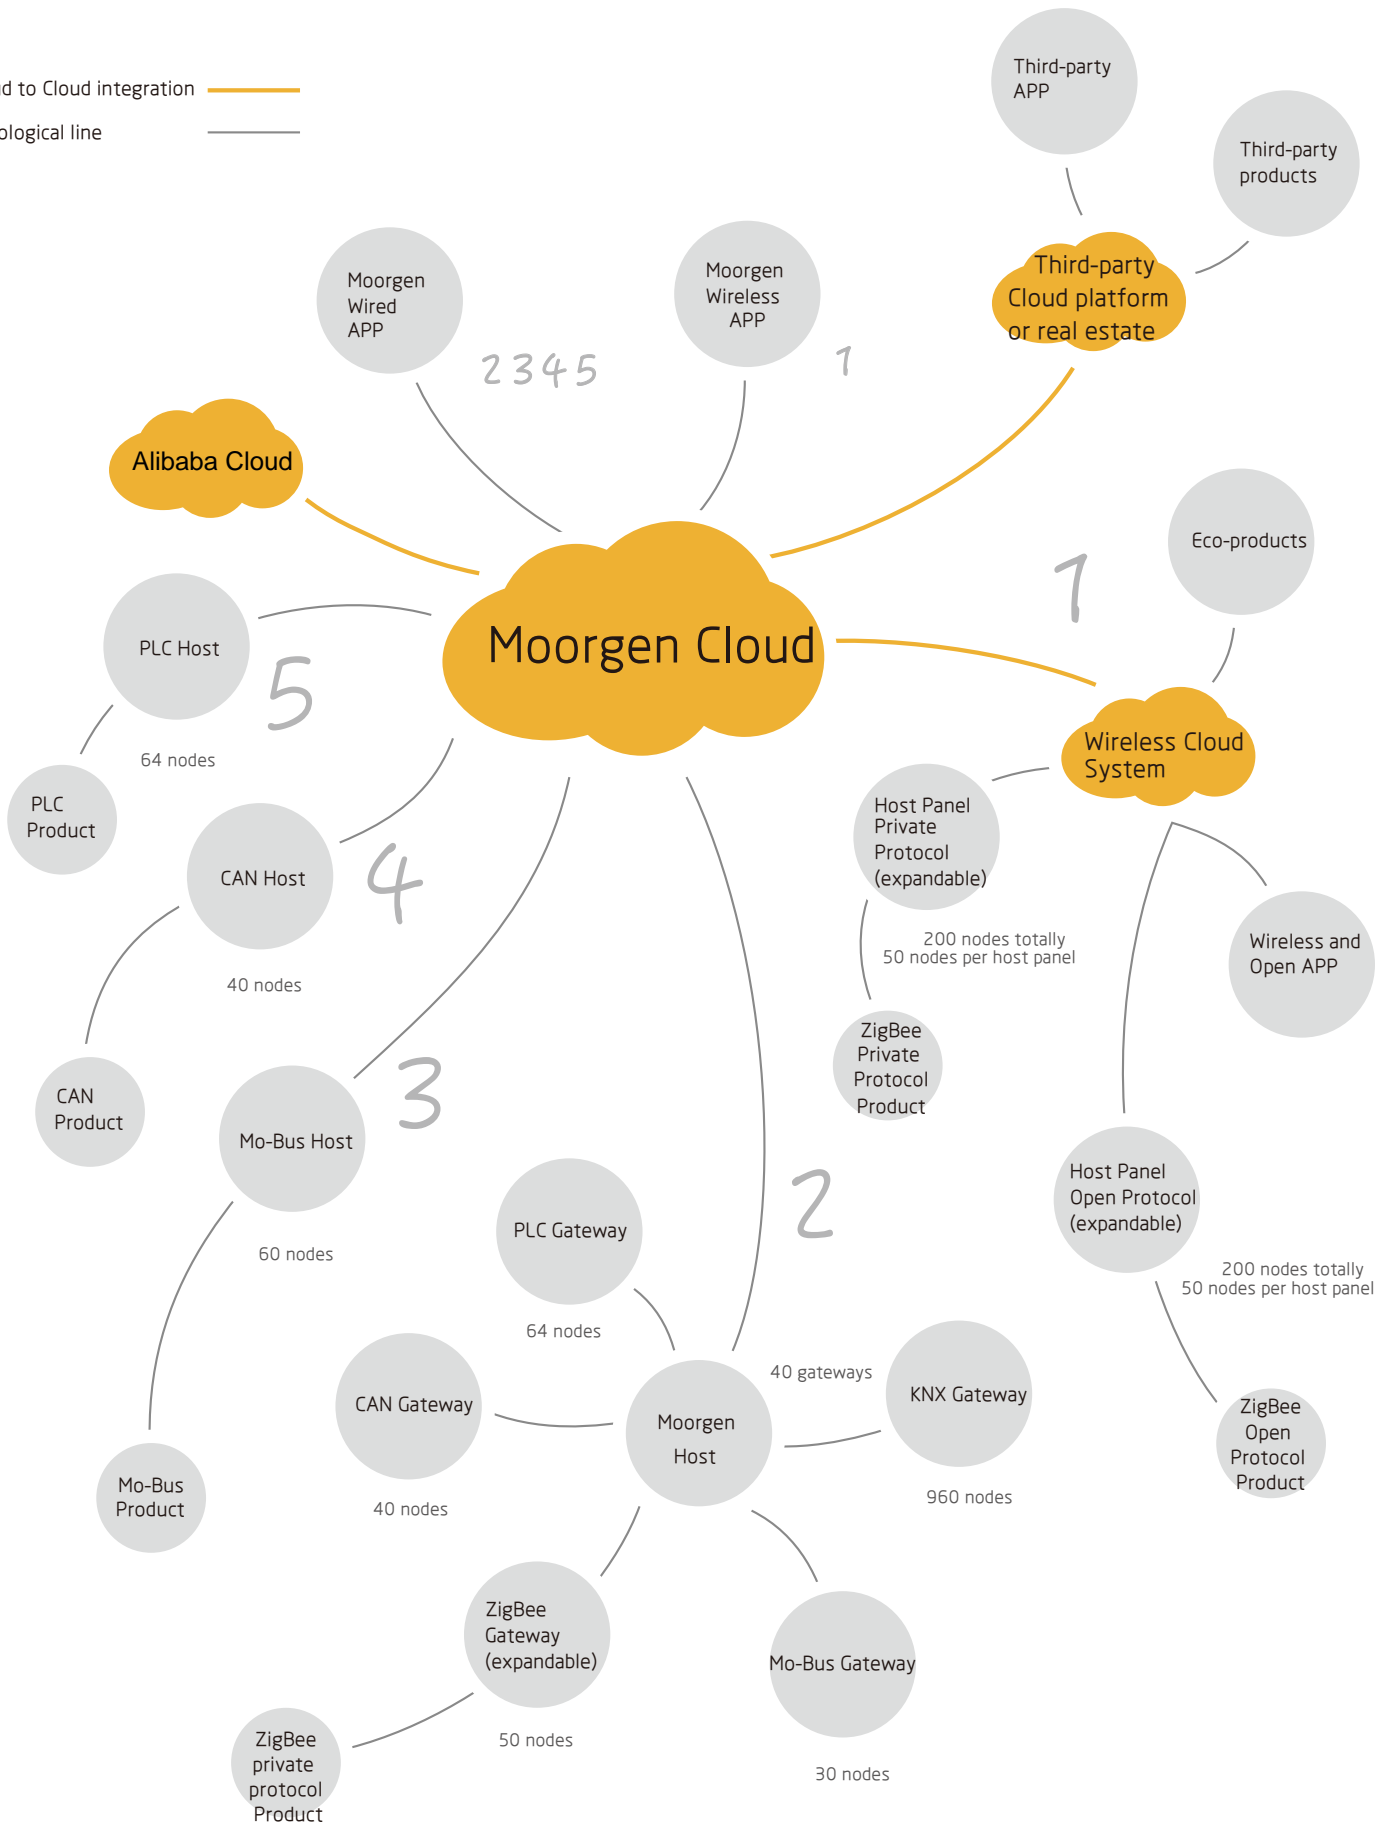

Motion Sensor MK5026

2022.02

- Protocol: KNX
- Installation: Ceiling installation Detect human
- motion and ambient light level
- Dimension:Φ50.4 mm

Cloud to Cloud integration ———
